

XENTRY KIT 3: XENTRY Diagnosis Pad

Brief description

The XENTRY Diagnosis Pad, in an improved design with faster processor, more memory and an SSD hard drive, represents a high-performance diagnostic computer for operation of the XENTRY Diagnosis VCI.

Advantages to the XENTRY Diagnosis Pad

- Large fast SSD hard drive
- Large main memory
- Windows 10 operating system
- Current Intel processor generation
- Convenient to operate thanks to freely adjustable raising device, touchscreen and good display legibility

Technical data

Individual parameters	
Hard drive:	512 GB SSD
Memory:	8GB DDR3 1600 RAM
Processor:	Intel® Core™ i5
Operating system:	Windows 10 64bit Professional
Dimension:	approx. 350 mm x 244 mm x 46 mm (same as XENTRY Tab/Tab 2)
Weight:	approx. 2590 g
